

AI Visibility Report

How well AI answer engines can find, read, and cite

echorank360.com

Generated 01 August 2026

This report analyses publicly available signals (robots.txt, rendered HTML, structured data, metadata and sitemaps) at the time of generation. It is a technical readiness assessment, not a guarantee of inclusion in any specific AI assistant's answers. Scores reflect EchoRank 360's scoring model and may change as your site or the AI landscape evolves.

Executive summary

/ 100 AI Visibility Score

Grade A

Strong AI visibility — AI answer engines can find, crawl, and cite this site well.

Top findings

- **Content signals** — thin / key pages not found (recover up to +4 pts)
- **Structured data (JSON-LD)** — Answer, FAQPage, Offer, Organization, Question, SoftwareApplication (recover up to +2 pts)

Detailed results

Scored checks

Each row shows the points earned versus the maximum. The bar is a visual aid only — the numbers are authoritative.

Check	Score		Status
robots.txt AI access	25 / 25		All AI crawlers allowed
Server-rendered content	20 / 20		Server-rendered (~15285 chars of text)
Structured data (JSON-LD)	18 / 20		Answer, FAQPage, Offer, Organization, Question, SoftwareApplication
XML sitemap	10 / 10		Sitemap found
Head metadata	13 / 13		complete
Heading structure	5 / 5		Single clear <h1>
Content signals	3 / 7		thin / key pages not found

AI crawler access (robots.txt)

Whether each major AI crawler is permitted to fetch your pages. Access is stated in words (ALLOWED / BLOCKED), never colour alone.

AI crawler	Access	Detail
GPTBot	ALLOWED	allowed (matched '*')
OAI-SearchBot	ALLOWED	allowed (matched '*')
ChatGPT-User	ALLOWED	allowed (matched '*')
ClaudeBot	ALLOWED	allowed (matched '*')
Claude-User	ALLOWED	allowed (matched '*')
anthropic-ai	ALLOWED	allowed (matched '*')
PerplexityBot	ALLOWED	allowed (matched '*')
Perplexity-User	ALLOWED	allowed (matched '*')
Google-Extended	ALLOWED	allowed (matched '*')
Applebot-Extended	ALLOWED	allowed (matched '*')
CCBot	ALLOWED	allowed (matched '*')
meta-externalagent	ALLOWED	allowed (matched '*')
Bytespider	ALLOWED	allowed (matched '*')

Prioritised recommendations

Content signals **[High priority]**

Finding: thin / key pages not found

Do this: Add or link an About and FAQ page with substantive, factual copy.

Expected impact: recover up to +4 points.

Your next steps

1. Content signals
2. Structured data (JSON-LD)

Track your score weekly
